

## Suleiman Kerimov (Profile)

### Russian Oligarch

*Suleiman Kerimov is often referred to as mysterious and secretive. He is primarily an investor, never holding onto assets long and seeking to flip them for vast profits. He is well-connected, and operates offshore investment groups, many of which are largely opaque. Kerimov's success is related to his ability to rapidly secure capital. This is mainly due to having 'his own people' in banks. In addition, he is believed to act as a front for the Kremlin elite.*

*Included with this personality profile is an indicative relationship and asset map.*
