

Kingdom Holding Company (Profile)

Multi-Sector Conglomerate

A review of Saudi's business environment is not complete without looking at Kingdom Holding. With a portfolio of assets in the tens of billions of dollars, the entity and its decision makers are among the MENA region's most influential. It represents great opportunity for outsiders looking to engage – given its internationally oriented investment mandate – but this should be considered vis-à-vis the various political risks that may increasingly accompany its operations.

Included in this corporate profile is a graphic detailing the company's management and commercial interests.

Publication Date: 3rd May 2018
